A Joinery Solutions Company

Ravier

Advanced high frequency bonding techniques are used to create beautifully engineered balanced panels from prime selected hardwood timbers and acrylic with invisible gullines. These unique panels are used in superior furniture applications. All items are produced raw in France. We offer a full finishing and fabrication service from our works here in the UK.

Cristal

3-Pil

Ravier Cristal - 8mm and 20mm thick panels made from solid hardwood and acrylic strips. Panels are used within frames or as stand-alone doors or components. Various different wood and acrylic width combinations can be mixed to stunning effect. The material can be given a highly polished or opaque finish. Back lighting further enhances the look.

Ravier Arcance - Special permutations of varying woods and stained veneers in a multitude of different combinations. Allows for the creation of highly attractive edge and face details. The machining of component pieces is carried out to high levels of both tolerance and quality. Imagination is the only limiting factor.

Ravier 3-Pil - 21mm thick panels made from 3 layers of 7mm solid hardwood, cross-banded together. Each panel is balanced and has knot free edges and faces. A wide range of panel sizes are available ex-stock in certain woods, other species to order.

Radiator & Heater Cabinets

Finishing touches make all the difference..... Radiator & Heater Cabinets by Taskworthy add style to any room, elegantly covering-up unsightly radiators whilst adding value to a property. Whether you choose from our standard range or have our designers develop a design solution to meet your precise brief, all Taskworthy cabinets are manufactured to the same exacting standards.

We offer a wide range of decorative grilles to suit this and other applications. All cabinets are pre-assembled and spray finished inside and out to ensure no uptake of moisture.

Cabinets are made to measure, please enquire about our self measurement form so we can give you a competitive quote. A survey and installation service is also available please contact our Cabinet Department 1. (01981) 242912

Joinery Solutions

Bespoke Joinery - Our bespoke joinery facilities and experience enable us to offer a complete manufacturing capability.

We accept our client's drawings in CAD format or as hand sketches. Our hands-on design and production team is able to assist with project planning, material selection, problem solving, creativity and cost considerations. All projects are then confirmed for approval prior to manufacture.

We understand the importance of being able to provide fully finished solutions to our customers. Our close attention to detail and desire to satisfy has ensured our success for over 10 years. We believe that our wide experience of joinery methods, innovative materials and compatible finishes is of great benefit to our clients.

Our facilities include: CAD/CAM, CNC Routing/Point to Point Drilling/Panel Sizing, Veneering, Laminating, Calibration Sanding, Carcase Construction and Controlled Environmental Spray Painting along with a wide range of modern and traditional joinery equipment.

Retail & Contract Furniture

Over many years we have built our reputation by listening to our client's needs, solving their problems and producing design-led solutions.

Taskworthy are able to manufacture to your own design drawings, or alternatively, our hands-on design and production teams are able to assist you with design, planning and material selection to develop a range of furniture to reflect your precise requirements, budget and sense of style.

Using CNC technology, accuracy is our speciality. We cater for batch production rather than volume so that all our furniture receives that special attention to detail. We provide a bespoke service for clients who want the ultimate in tailor-made furniture.

Our furniture is manufactured using a balance between modern techniques and traditional joinery methods for that hand crafted finish.
