

### Ravier sa - France

A progressive company specialising in advanced machining and vinyl bonding techniques to create beautifully engineered balanced panels from solid hardwood timbers and acrylics with invisible glue lines. All raw items are manufactured to the highest standards in France.

### Taskworthy Ltd - UK

As distributors for Ravier we complement their abilities. We are able to offer Ravier Products either raw to manufacturers or as fully finished items. These unique panels are used in superior furniture applications. Our 11,000sq ft Joinery Solutions workshop complete with CAD/CAM, CNC cutting/routing/drilling, Sanding and Spray Finishing enables us to offer the complete service to our customers.

Oak

## Ravier Cristal

Innovation at its best.

- Solid hardwood and acrylic strips bonded together with invisible gluelines.
- 8mm and 20mm thick panels.
- Panels can be used within frames or as stand-alone doors or components.
- Various different wood and acrylic widths are available.
- The material can be given a highly polished or opaque finish.
- Extremely effective when used in conjunction with lighting.
- Special fabrications for other uses possible.

No minimum quantities. All items are made to order

Available in all hardwoods.

Normal panel thicknesses: 8mm and 20mm

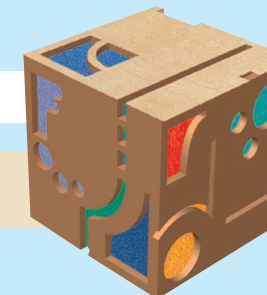

Maximum panel sizes: approx 1200mm (grain direction) x 800mm

Wood strip widths: 6, 9, 13, 17 and 21mm

Acrylic strip widths: 6, 8, 10 and 18mm

Strip widths can be mixed.

## Ravier Arcance

Varying woods and stained veneers bonded together to stunning effect.

- Arcance is about imagination.
- Endless permutations are possible to create contrasts between different wood hues, end grains and coloured veneers.
- Different pieces can be positioned within panels and exposed by routing.
- Striped panel edges and faces can be created.
- Whole blocks can be glued up to create furniture components.

No minimum quantities. All items are made to order.

Available in all hardwoods and a wide variety of coloured stained veneers.
